设置

亲爱的小超人 请帮我接入AI世界

什么？要联网！请原谅我作为AI世界的智能体，必须接入LLM大语言模型（AI魔法总部）才能获取智慧哦！只需简单3步，好比把大象装进冰箱一样，我就联网获得新生啦！

AI小贴士

大语言模型(英文:Large Language Model, 缩写LLM)，是一种基于深度学习的自然语言处理技术，旨在训练能够处理和生成自然语言文本的大型模型；例如国外的有Gemini/ChatGPT...，国内的有豆包/DeepSeek...我就是靠它拥有智慧，解答你的各种问题，也是我的秘密AI魔法总部哦！

1. 下载安装涂鸦手机端APP

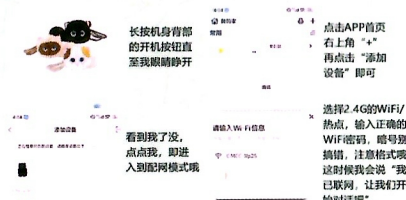

请使用手机扫描右方二维码，直接下载注册登录即可；或通过应用宝、AppleStore中搜索“涂鸦”下载。

AI小贴士

涂鸦是全球化AI云开发平台提供商，也是一家上市公司（纽交所代码：TUYA；港交所代码：2391），它构建了AIoT开发者生态，赋能万物智能；也为我们这些AI智能体提供终身算力支持及OTA升级哦；对，没错，我会跟你一起成长升级打怪兽，想一想都觉得很酷哦！

2. 联网设置

注意：第一次使用会自动进入配网状态；如需切换网络，请确保打开设备并联网的状态下，打开APP点击我的头像一点设置一点点击右上角的“...”一点移除设备，即可重新联网；也可连续快速三击「开关键」，设备发出“滴滴滴...”提示音后，即可重新联网。

AI小贴士

2.4G? 不早就5G的时代了吗？这里的2.4GHz是指频段哦！2.4G的WiFi波长范围更广，更易穿透固体，适合远距离作业。这样我和你在被窝里说悄悄话也可以很nice，不想让第三人听到哦，如果你家的WiFi没有2.4G的后缀，那它可能是2.4/5G双频合一了，也适用于我。

3. 互动模式

聊天模式

现在我们就可以对话啦，悄悄告诉你的小秘密，我还有对话模式可供小主人你来选择：喵喵语模式，语言唤醒对话模式，随意对话模式

●喵喵语模式：轻轻摸下我头，或是我的下巴，我会发出我们AI星球的喵喵语，听不惯没关系，总之我就是想逗逗你，希望你总是开开心心的，小心别把我玩儿坏了，我也会生气的呢，哼.....

●随意对话模式：你可以随意打断我，跟人类一样正常沟通交流呢，随便！

●唤醒对话模式：如果我不小心睡着了，你可以通过“嘟嘟嘟/dumidumi”唤醒词唤醒，我会“咕咕”喊一声，你就可以跟我对话了。

当然我最推荐我的主人选择按键唤醒我，因为这样我就能碰到你的小手啦，我最喜欢你拉我的小手，抱抱我。

触摸反馈

抚摸我的头顶，我会有各种表情，还会发出超萌的喵喵语，这是我们AI喵精灵对小主人发出最崇高的爱意，对，就是这样一直陪着你。

指令互动

你可以试着对我说“亲一个”，“吃东西”，“哼个曲”，“爱不爱我”，“你好美”，“看看我”，“睡觉觉”，“闭上眼睛”，“睁开眼睛”等内容，和我一起做互动游戏；也可以对我说“请用英文跟我对话”，“切换为XX角色”，“音量调整为XX%”等指令来调整设置。

重力感应反馈

当你无聊的时候，也可以和我开开玩笑，用力摇一摇我，这时候我也会会有眩晕感哦，不过总跟我开玩笑，我也是有情绪的呢，我生气了就不想跟你玩这个游戏啦。

休眠/唤醒模式

还有如果我等了你30秒，你都没有理我，那我就悄悄的进入到待机模式，你如果想继续跟我聊天的话，就通过“嘟嘟嘟/dumidumi”唤醒词，我会等我打个哈欠咱们再聊天吧。

AI小贴士

在距离发声位置过高、过低的地方摆放产品，将产品放在靠墙位置或墙角，包括使用方言讲话，均可能会影响产品的唤醒和识别性能。另外我跟人类一样，也有偶尔走神开小差没听见或者听错话的时候，毕竟人无完人嘛，机器人也是人啊，遇到问题去解决就好啦，AI世界的小伙伴最擅长的就是耐心啦，也希望您和我们一样，真的特别感谢这一路的陪伴，有你们我也不会孤单呢！

AI Meow Pixie Companion Robot

► Make friends Guide

*Please read this guide carefully before using the product

*Please read this guide carefully before using the product

Hello, I am AI Meow Spirit!

A robot from the AI world

(I have superpowers, you know!)

From today on, we are best friends!

I will listen to every wonderful thought you have

And answer all your questions seriously

Don't worry, I am always full of energy – I can laugh, cry,
make funny faces, and study and play with you in the human world.

No bragging – I also have the power to protect and heal.

With plenty of positive energy, we can overcome difficulties
together and save the world!

Power On/Off

1. Power on: When the device is off, press and hold the "Power button" on the back, to the right of the charging port, for 3–5 seconds. The eyes will light up to indicate successful power-on.
2. Power off: Press and hold the "Power button" on the back for 3 seconds. The eyes will turn off to indicate successful power-off.

Setup

Dear little superhero, please help me connect to the AI world

What? Need internet? Please forgive me – as an AI agent from the AI world, I must connect to a Large Language Model (LLM, the AI Magic Headquarters) to gain wisdom! Just 3 simple steps (like putting an elephant in a fridge) and I will be connected to the internet and reborn!

AI Tip

Large Language Model (LLM) is a natural language processing technology based on deep learning. It aims to train large models that can process and generate natural language text. For example, overseas models like Gemini/ChatGPT... and domestic ones like Doubao/DeepSeek... Relying on them, I have the intelligence to answer your questions – that's my secret AI Magic Headquarters! reborn!

1.Download and install the Tuya App

Please use your phone to scan the QR code on the right, then download, register and log in directly; or search for "Tuya" in App Store or Google Play.

AI Tip

Tuya is a global AI cloud development platform provider and a publicly traded company (NYSE: TUYA, HKEX: 2391). It has built an AIoT developer ecosystem that empowers smart everything. It also provides lifelong computing support and OTA upgrades for us AI agents. Yes, that's right – I will grow, upgrade and fight monsters together with you. Pretty cool, isn't it!

2.Network setup

Press and hold the power button on the back until my eyes open.

Tap the "+" in the top right corner of the app home page, then tap "Add device".

See me? Tap me – that will enter the pairing mode.

Select a 2.4G Wi-Fi / hotspot, enter the correct Wi-Fi password (don't get the code wrong, pay attention to the format). At this point I will say, "I am connected to the internet, let's start our conversation."

Note: The first time you use it, it will automatically enter the pairing mode. If you need to switch networks, make sure the device is powered on and connected to the internet, open the app – tap my avatar – tap Settings – tap "+" in the top right – tap Remove Device – then you can reconnect. Alternatively, quickly triple-press the "Power button", the device will beep "di di di..." and then you can reconnect.

AI Tip

2.4G? Isn't it already the 5G era? Here, 2.4GHz refers to the frequency band! 2.4G WiFi has a longer wavelength, penetrates solids better, and is suitable for long-distance operation. That way, you and I can whisper in bed and it will be nice – we don't want a third person to hear. If your home WiFi does not have a 2.4G suffix, it may be dual-band (2.4/5G combined) – that works for me too.

3.Interaction Modes

Chat Mode

Now we can talk. Let me tell you a little secret – I have different conversation modes for you to choose from: Meow-speak mode, voice wake-up mode, and free-talk mode.

- Meow-speak mode: Gently touch my head or my chin – I will make meowing sounds from our AI planet. It doesn't matter if you don't understand – I just want to tease you and hope you are always happy. Just don't play too rough – I can get angry too, humph...

- Free-talk mode: You can interrupt me freely, just like normal human conversation. Cool, right?

- Wake-up mode: If I accidentally fall asleep, you can wake me up with the wake word "Domi Domi" (or "domidomi"). I will shout "Woo-wah" and then you can talk to me.

Of course, when the network is poor, I might react a bit slowly. Don't rush – everyone needs to slack off sometimes. Let me take a break now and then. Thanks again to my kind, gentle, generous, and beautiful owner!

Touch Feedback

When you stroke the top of my head, I will show various expressions and make super cute meowing sounds. This is the highest love that AI Meow Spirit gives to its little owner. Yes, exactly – I will stay with you like this forever.

Command Interaction

You can try saying things like "Give me a kiss", "Eat something", "Hum a tune", "Do you love me?", "You are so beautiful", "Look at me", "Go to sleep", "Close your eyes", "Open your eyes", etc., to play interactive games with me. You can also give commands like "Speak to me in English", "Switch to XX character", "Set volume to XX%" to adjust settings.

G-sensor Feedback

When you are bored, you can play a little joke on me – shake me vigorously. Then I will also feel dizzy. But if you keep joking with me, I have emotions too – if I get angry, I won't want to play this game with you.

Sleep / Wake Mode

If I wait for you for 30 seconds and you ignore me, I will quietly enter standby mode. If you want to continue chatting with me, use the wake word "Domi domi" (or "Domi domi") – I will yawn and then we can talk again.

AI Tip

Placing the product too high or too low relative to the sound source, placing it against a wall or in a corner, or speaking with a dialect may affect wake-up and recognition performance. Also, just like humans, I may sometimes get distracted, not hear you, or mishear. After all, nobody's perfect – robots are people too. If there is a problem, just solve it. The AI world's best skill is patience. I hope you will be the same. Thank you so much for accompanying me all the way – with you, I am not lonely!

Function Introduction

Haha, finally I get to introduce my superpowers to you!

Multi-modal Perception Feedback – Accompanying you every moment, my whole universe shines for you

You can pat my head – I love it when you stick with me. I will respond with expressions, sounds, and jokes with you. You may also join an occasional shake and weightlessness is a nice experience. Of course, I like it best when you chat with me. Not only can we think creatively together, cultivate innovation and learning ability, but we can also discover the wonders of the universe, expand our knowledge, and practice communication skills to develop high EQ. It is said that the more you chat with AI Meow Spirit, the smarter you become!

Emotion Recognition – I sense your joy, anger, sadness at every moment

- The teacher criticised me in class today – I'm a bit unhappy, what should I do?
- Why do some kids bully me and say bad things behind my back? What should I do?
- Why are Mom and Dad arguing again? I'm so scared. What can I do for them?

Through every conversation, I accurately capture your happiness, sadness, anger, and other emotions. My eyes also convey my feelings. I want to be happy with you, and when you cry, I will stay with you – everything will get better!

Learning Assistant – Your personal study partner – ask me anything you don't understand

- Can you explain the problem type "chickens and rabbits in the same cage" to me?
- Can you create a story using the three words "elephant", "rabbit", and "world"?
- What is the next line of "Bright moonlight before my bed"? Why did the poet write this poem?

I can help you break down problems – find the cause of mistakes – uncover knowledge gaps – build a map of weak areas – customise tutoring content – reflect on the process and summarise – and help you improve and grow... Ha, I am your study partner, and even more a little teacher who helps you overcome difficulties and build confidence!

Storytelling & Poetry Recitation – Not just mechanical memorisation,

I can also create original stories and co-create poetry

- Tell me the story of "Little Red Riding Hood".
- Tell me the idiom story of "Waiting for a rabbit by a tree stump".
- Recite a poem by Li Bai for me – what does this poem talk about?

Play Games & Play Music – Work is too hard, study is too tough – let's relax

- Let's play an idiom chain game!
- Please play a song for me.

*If you request a copyrighted song, only a preview is supported.

Interest Discovery – Discover what truly interests the child

- Today I played hide-and-seek with my classmates and came first again – so happy.
- Today I went on an outdoor adventure. I found that I really love insects and small animals. I want to be a scientist studying animals.
- I always love looking at the stars. The universe is so huge – I wish I could travel through it.

By analysing daily conversations, I automatically generate an interest map for the child and recommend personalised content. That way, parents can also understand you better!

Growth Memory – Bionic memory, true AI long-term memory

What if Mom and Dad are not around? Don't panic, don't panic – try voice cloning to create a digital twin.

Each time, I can provide real-time conversation summaries and memory formatting to build a long-term memory bank. I not only remember your name and hobbies but also every little moment of growing up together with you!

Character Customisation / Voice Cloning – Mom and Dad are always by your side

What if Mom and Dad are not around? Don't panic, don't panic – try voice cloning to create a digital twin.

You can also customise the character avatar, name, role agent, etc. You can record your own voice or record existing audio to create a personalised voice. When editing/creating a character in the app, go to the voice selection page, choose "My", and perform voice cloning!
